Unlocking Clean Energy Pathways for Global Shipping

“Marintec once again exceeded our expectations. It is without comparison the biggest marine exhibition globally. The combination of high-quality visitors and industry leading seminars are the perfect opportunity to demonstrate our latest technology and development.”

Bjarne Foldager
Senior Vice President,
Head of Two Stroke Business
Everllence

M I N O

Marintec Innovation 2024 was a landmark event, underscoring the maritime industry's commitment to sustainability. Hosted in Shanghai, the conference highlighted the urgent need to transition from high-carbon operations to low-carbon and ultimately zero-carbon solutions.

MINO 2024 | A Milestone in Maritime Sustainability

- **500+ Esteemed Speakers and Delegates:** Senior leaders and experts shared transformative strategies to drive sustainable practices.
- **20,000+ Engaged Viewers:** The Marintec WeChat Mini Program attracted significant attention, reflecting the industry's growing focus on decarbonisation.

MINO 2025 | Introducing Energytec

Marintec Innovation 2025 introduced the groundbreaking "Energytec" initiative, focusing on alternative energy sources and the maritime industry chain. This programme invited global enterprises to collaborate and accelerate the decarbonisation of maritime operations. Key highlights included five themed sessions: Keynote Address, Alternative Fuels, Electrification, Natural Sources and Nuclear Power.

MINO 2026 | Driving the Energy Transition

Building on the success of previous editions, Marintec Innovation 2026 sharpens its focus on the energy transition and its supply chain, offering a comprehensive program that addresses challenges such as supply chain limitations, regulatory hurdles, and infrastructure gaps. The event aims to support the maritime industry in striving to meet the ambitious IMO decarbonisation targets for 2030, 2040, and 2050.

- **Keynote Address** Insights into global fleet trends and the economics of decarbonisation.
- **Session I: Laying the Foundation** Managing the transition with dual fuels and immediate efficiency gains (*Current practices*).
- **Session II: Powering the Future** Propulsion by electricity, wind, and wave energy (*Emerging solutions*).
- **Session III: Achieving Net-Zero** Feasibility of SMRs and liquid hydrogen for long-haul shipping (*Future innovations*).
- **Closing Session** Strategic reflections and the unveiling of Energytec 2027.

MARINTEC INNOVATION POWERING THE FUTURE

3-4.12.2026 | St. Regis, Shanghai

Marintec Innovation represents the pinnacle of thought leadership and technological advancement within the maritime sector. As the flagship forum under Marintec China, Asia's foremost international maritime exhibition, it is strategically designed to convene decision-makers, industry leaders, technologists, innovators, and regulatory authorities. This premier event plays a critical role in shaping the trajectory of the global maritime and offshore industries, aligning with the IMO's 2030, 2040 and 2050 decarbonisation targets.

LOOKING AHEAD

Marintec Innovation 2026 is poised to serve as the global epicentre for alternative energy in maritime, reinforcing the industry's commitment to clean energy and sustainable operations.

Hosted in Shanghai, a city renowned for its world-class infrastructure, this flagship event will deliver actionable insights, foster strategic partnerships, and provide a clear vision for the maritime energy transition.

The event will also showcase cutting-edge technologies, providing senior management with insights into the latest advancements and investment opportunities.

Senior leaders are invited to join this transformative journey, driving green development and decarbonisation across the maritime industry. Together, we can shape a sustainable future and redefine the global maritime landscape.
